## Thermometers for a Prostar or Table-Top Processor

Having a reliable and calibrated thermometer to monitor your processor temperatures is extremely important. One or two degrees off of your aim temperature may mean the difference in a quality end product.

The information below is from VWR International, (<http://www.vwrsp.com/>) but, you can certainly search the web for other vendors. I suggest wherever you get your thermometer it have the attributes of the VWR product.

### VWR\* Precision Testing Dial Thermometers

Supplier: VWR International
